Correction of the type citation for *Salix* × *chrysostrala* Dode (Salicaceae)Irina V. Belyaeva^{1,2}¹Royal Botanic Gardens, Kew, Richmond, TW9 3AE, UK²Russian Academy of Sciences, Ural Branch: Institute Botanic Garden, 8 Marta, 202A, Yekaterinburg, 620144, RussiaEmail: i.belyaeva@kew.org; willow.belyaeva2017@yandex.com

Correction received: 3 March 2020 | published online: 10 March 2020

In a recent paper by Belyaeva *et al.* (2018), the location of the neotype of *Salix chrysostrala* Dode was given as MHA. However, during an inventory of original material in the herbarium collection of *Salix* L. in MHA, Nina Yu. Stepanova was unable to find this type specimen. She asked for clarification by the corresponding author who then discovered an error in the type citation for *S. chrysostrala* in the paper, on page 48 of *Skvortsovia* 4(2).

The correct type citation should read:

S. × *chrysostrala* Dode, [Bull. Soc. Dendrol. France 76: 93](#). 1930.

Type: France, Versailles, 1925, [as *Salix vitellina* L.] fragment with staminate flowers (neotype, P([P05496381!](#))), **designated here** by I.V.Belyaeva).

Acknowledgements

Nina Yu. Stepanova (MHA) is acknowledged here as the person who drew the author's attention to the specimen cited in the paper.
